

## **STILL-LIFE DRAWING**

**Still-life drawing is the drawing of non-living objects. These objects can be easily seen around us.** There are many still-life or non-living objects in our environment such as football, cup, umbrella, basket, shovel, broom, cutlass and so on. When we draw any of these objects, we are engaging in still life drawing. Still life drawing is easy because the objects we are drawing do not move about since they are lifeless.

### **Materials used for still life drawing**

1. Pencil
2. Eraser
3. Drawing paper
4. Drawing board

### **Class activity**

Draw a still life object of your choice or one given by your teacher with pencil. Take note of the part of the object where that is more exposed to light. Use your shading to indicate where there is more light and where there is less light. Shading also show u the position of shadow of an object
